Civil Engineering

Creative Consulting Solutions

Greenhorne & O'Mara (G&O) provides a full range of consulting and design services for both public and private sector clients. Our principal services include planning, engineering, landscape architecture, and geospatial services. Project types include residential, mixed-use, institutional, office, recreational, energy, and industrial designs. Our experienced project teams provide services for every stage of a project from concept through construction. We are committed to our clients and communities and have a long history of providing innovative approaches for sustainable and responsible growth.

Project Highlights

7th Special Forces Group Complex (BRAC) | Eglin Air Force Base, FL. G&O provided civil, structural, and transportation engineering and related permitting on a 350-acre site to relocate personnel from Fort Bragg, NC to Eglin Air Force Base, FL. This \$300 million project encompasses 25 main buildings in a new military base setting. Five G&O offices and two market groups collaborated in order to meet a highly compressed design schedule.

Garden of Remembrance Cemetery | Montgomery County, MD. G&O provided all civil site engineering for the 150-acre Garden of Remembrance Cemetery — the region's only not-for-profit cemetery open to members of all Washington, D.C. metropolitan region Jewish congregations as well as those unaffiliated with a congregation. The multiple phase development of the site included administrative facilities, a columbarium, grave sites, transportation infrastructure, visitor structures, and landscaping.
