TRAFFIC ENGINEERING

Traffic Engineering

Exceptional Service. Innovative Ideas.

Greenhorne & O'Mara (G&O) offers a wide variety of traffic engineering services to both the public and private sectors. Our services include traffic data collection, traffic impact studies, traffic signal design, signing and pavement marking plans, bicycle/pedestrian studies, traffic signal warrant analysis, capacity analysis, access and circulation studies, transportation management plans, traffic control plans, traffic forecasting, traffic operations and safety evaluations, municipal consulting, and expert witness testimony.

G&O is committed to providing clients with exceptional service and innovative ideas. We are equally committed to remaining leaders in the field of traffic engineering, making the public's transportation experience safer and more efficient.

Project Highlight

Traffic Engineering Services, Maryland State Highway Administration – District 3 | Montgomery and Prince George's County, Maryland. For the past decade, G&O has provided traffic engineering support services to District 3 of the Maryland State Highway Administration. G&O's services consist of performing traffic safety studies including data collection, signal warrant studies, speed studies, and preliminary design, as well as the preparation of traffic signal design plans and maintenance of traffic plans. Tasks to date include:

- High Accident Location Studies
- Bicycle/Pedestrian Coordinator
- Rockville (MD) Pedestrian Study
- Traffic Counts
- Intersection Analysis
- In-House Technical Support
